

The U.S. government’s International Traffic in Arms Regulations (ITAR) govern the dissemination of broad categories of technical information, including military and space electronics (models, mockups, and other such items are also included).

The *Code of Federal Regulations*, Title 22, Chapter I, Subchapter M, section 120.8 specifically includes “training” as a concern. Among other requirements, the regulations prohibit disclosing or transferring regulated technical data to a foreign person, whether in the United States or abroad. That information can take many forms, including:

“Information...[ellipsis], which is directly related to the design, engineering, development, production, processing, manufacture, use, operation, overhaul, repair, maintenance, modification, or reconstruction of defense articles. This includes, for example, information in the form of blueprints, drawings, photographs, plans, instructions, computer software and documentation. This also includes information, which advances the state of the art of articles on the U.S. Munitions List. This definition does not include information concerning general scientific, mathematical or engineering principles commonly taught in academia.” Sec. 120.21 (c)

Companies must put in place mechanisms that prevent violations. These regulations hold companies accountable for the acts of anyone that accesses technical data.

Penalties for export violations can be severe—\$1M and 10 years in prison per violation, and the loss of government contracts.

Some content presented in the classroom and in course materials may fall under the ITAR provisions. You are being given notice of your responsibility to protect this information. In order to address these requirements, CIBER requires that you sign an agreement attesting to your status as a U.S. citizen and confirming that you will not transfer content provided in this course to a foreign-born person.

Your signature affirms that you are a U.S. citizen, that you have read this statement, and that you accept responsibility for protecting this information. Please indicate the date signed after you sign.
